

LLM observability platforms: Decision Brief

LLM observability platforms: Decision Brief

Executive Summary

LLM observability platforms: coverage 1/3 primary questions, 5 recommendation-safe claims, contradiction count 0.

Decision Context

- Goal: Produce an evidence-backed analytical report for a real decision.
- Subject: LLM observability platforms
- Decision context: Choose a primary platform for a production pilot in the next two quarters.
- Geography: global
- Time horizon: current

Evaluation Frame

- trace depth
- evaluation tooling
- self-hosting
- governance

Key Findings

- It is strongest when a team wants one surface for debugging runs and measuring regression over time. [Evidence: 21c6568d-0e64-4639-b577-f6474ac8eb78, 92d68e51-8420-4fac-8c09-1134ea08d528]
- Langfuse combines tracing and scoring with open-source and self-hosted deployment paths. [Evidence: 4f6a9500-7cb6-4a75-af94-52bad5800ea1, b88f0092-1f06-402a-85e8-d3a5ff004492]
- Helicone is strong when lightweight instrumentation and cost visibility matter more than a heavyweight evaluation stack. [Evidence: 185eab29-49e9-4ea4-b965-618841ab91b1, 769171c7-bceb-4e6c-be15-ac32190527d6]
- It is attractive for teams that need observability plus privacy control and do not want to depend entirely on SaaS-only operations. [Evidence: 17c02e13-7048-4960-9574-9863cd573f5c]
- It is a practical fit for operational analytics, but less obviously the best choice when experiment rigor is the main buying criterion. [Evidence: 1ddc9cbe-8646-4f8b-b5cb-0ede02a7d75e]

Comparative Analysis

- Which platform is strongest for traceability and evals?
- Which options fit privacy-sensitive deployments?
- Which tools are best for fast operator debugging?

Recommendation and Decision Posture

- Bounded recommendation: evidence is informative but not strong enough for an unqualified winner call.

Gaps & Risks

- Which options fit privacy-sensitive deployments?
- Which tools are best for fast operator debugging?
- Prefer pragmatic operating cost and privacy-aware deployment.

Evidence Coverage

- Covered questions: 1/3
- Contradiction count: 0
